

Document #16

VHN AH Computer entry for *Non-Family Planning* IUD Removal Request.

There are occasionally clients who come to the HD as *Non Family Planning* Clients who request only to have their IUD removed. This is an AH encounter visit that will not slide.

To provide this service, the following Encounter Entry process will be used:

1. Encounter will be built as an AH encounter by the clerical staff during intake.
2. The nurse will go to VHN Encounter screen and “Update”.
3. The nurse will choose the appropriate **visit type** 1, 2, or 3
4. General Office-**SKIP THIS**
5. Diagnosis- choose V25.42 IUD Check/Reinsertion/Removal
6. Procedure-choose 58301 IUD Removal
7. Go to the LAB Icon (microscope) and put in your PTST pregnancy test
8. It will ask you to post your lab results.
9. Post positive or negative
10. **IMPORTANT! When you exit the lab screen after posting the pregnancy test results, you will see that a CPT code 99214 “Est Pt. Detailed Hx&Exam Moderate” code, has attached with the 58301 IUD Removal code (this will give you the correct RVU). This will pull the appropriate non sliding charges into billing, for the client to pay when they leave. (That is why you will NOT choose a General Office Visit Type) The CPT code is already attached to the procedure code.**

This will go into effect on August 1st with the new Fee Schedule.
