Document #13

County Adjustment Code 847 for County purchased Vaccines

The following code (847) will be used for adjustment of price regarding County Purchased vaccines.

Your **County Purchased** Vaccine codes will have a charge of \$300 attached until all the counties go to the same price after the first of the year. The billing clerk will use the 847 adjustment code "adjustment for cost of vaccine", when checking out the client, and will adjust the price down to what you are actually charging for the immunization. It is recommended that clerical personnel make a cheat sheet of adjusted prices, to expedite the check out process. Please inform the client of this adjustment.
