

Document #3

Charging for:
HIV
ORAQUICK
ORASURE

When charging \$35 for the HIV, Oraquick, and Orasure you must put LDRAW4. The charge will no longer be attached to the test code itself, as we cannot “charge” for these state provided tests. The charge is for the nurse’s time, counseling and education. So, you must put in LDRAW4 along with the test code of HIV, ORAQUICK, or ORASURE whichever you are doing, to create the \$35 charge to the paying client.

Again IT will notify you when they are working on the changes in your counties tables.
